GENODERMATOSES  
ET MEDITERRANEE

## WELCOMING ADDRESS

Dear colleagues,

The Clinical Genetics Department of the Cyprus Institute of Neurology and Genetics and the Makarios III Hospital is organizing the “Together Against Genodermatoses (TAG)” international seminar to be held in Nicosia, Cyprus over the dates of November 12-13, 2011. On behalf of the organizing committee, it is our great pleasure and privilege to invite you to participate in this meeting.

“TAG” is an EU funded project which aims to improve the delivery of health care and social support for patients and families affected by rare and not so rare severe genodermatoses by bringing together the stakeholders involved in the health care and the social support.

We look forward to this seminar and we hope you will be able to join us. With your participation and support, we have no doubt that TAG seminar will be a great success.

Sincerely,

On behalf of the organizing committee  
Violetta Christophidou Anastasiadou  
Chair
